

NEW GLAZING PACKAGES

Harvey Building Products is excited to introduce new glazing packages that will simplify the ordering process. You will no longer have to worry about which glazing is needed for each window in order for it to qualify for ENERGY STAR®. These glazing packages make it easy to decide on the perfect window configuration for your needs.

Base Package

This package is always the least expensive version of a particular product. In most cases, it is simply made up of clear insulated glass. This glazing package does not qualify for ENERGY STAR. This will be the appropriate choice for customers who want the most inexpensive configuration.

ENERGY STAR Package

This package includes everything that is needed for a product to meet ENERGY STAR requirements. Glazing, gas, glass thickness, etc. will vary by window and usually includes Low-E coating and Argon gas. This glazing package does qualify for ENERGY STAR. This will be the appropriate choice for customers who want an ENERGY STAR qualified product.

High Performance Package

This package is available on our premium Tribute windows as well as select accessory windows with Tribute glazing. It incorporates triple glazing and Krypton gas for maximum energy efficiency. This glazing package exceeds ENERGY STAR requirements. This will be the appropriate choice for customers who want a product with superior performance.

In addition, a la carte options are still available for those who want specific types of glazing.

In summary, windows can still be ordered by the option, but these new packages will save time and help keep ordering simple.
