

Harvey Tribute Windows Awarded Environmental Green Seal®;
Line Delivers Superior Performance, Quality and Style in Competitive Market

Waltham, MA – Harvey Building Products is pleased to announce its Tribute line of windows has received Green Seal certification, independent verification of the high environmental standards in which the product was designed and produced to meet today’s demanding homebuilding and renovation market needs.

“We’re very pleased the Tribute window has earned Green Seal® certification. As contractors and homeowners in the Northeast have come to know, Harvey is committed to offering a consistent blend of performance, design options and value in our windows. Green Seal® recognition of the Tribute window makes it an even more attractive product among environmentally-conscious builders and consumers,” says Matt Samson, vice president, marketing, Harvey Building Products.

Tribute windows are premium vinyl, white on the interior with a choice of 28 exterior painted color choices to match any home. Homeowners can enjoy any of four hardware finish options – white, oil-rubbed bronze, brasstone and brushed nickel – to tailor each window even further. The windows’ upscale aesthetics include a contoured sash and glazing bead, as well as low profile locks with an integrated tilt/wash feature. In addition to double-hung styles, the line includes casement, awning, hopper, rolling, designer shape and picture windows plus patio doors

Every window comes standard with PPG SunClean® easy-cleaning glass, and the standard glazing is Double Low-E with Argon gas. This standard glazing package exceeds ENERGY STAR® qualifications. The optional High Performance Package incorporates three panes of glass for added performance and durability. Two panes of glass utilize Low-E coating while a third features Guardian ClimaGuard SPF™ UV protection glass that eliminates 99.9% of damaging UV light. Both airspaces contain Krypton gas for superior energy efficiency. All Tribute windows meet the new, more stringent federal requirements for tax credits available to homeowners.

Founded in 1989, Green Seal is a non-profit organization devoted to environmental standard setting, product certification and public education. Green Seal’s mission is to work toward environmental sustainability by identifying and promoting environmentally responsible products, purchasing and production. Green Seal certification of windows identifies products designed and manufactured in an environmentally responsible manner; ensures consumers that any product featuring the Green Seal Certification Mark has earned the right to

use it; and encourages manufacturers to develop new products that are significantly less damaging to the environment than their predecessors.

Harvey Building Products, a leading manufacturer of windows, doors and patio rooms, and a premier wholesale distributor of quality building products in the Northeast, has been serving professional contractors since 1961. Harvey continues to expand its investment in green manufacturing, distribution and product development processes and is an ENERGY STAR® partner. A privately held company, Harvey operates manufacturing facilities, branch warehouses and public product showrooms throughout the Northeast region.
