Window & Door Announces 2010 Crystal Achievement Award Winners

McLean, Va.--*Window & Door* has announced its 2010 Crystal Achievement Award winners. Selected by a panel of judges representing all segments of the industry, the awards recognize significant innovations and achievements in window and door technology, manufacturing and marketing.

"Ours is a resilient industry. Our 2010 Crystal Achievement Award winners make that abundantly clear," says John Swanson, editor/associate publisher. "Despite tough market conditions, window and door manufacturers and industry suppliers have stepped up efforts to innovate and enhance their products and services. The caliber of this year's winners—as well as all our nominees—suggests many companies have been focused on positioning themselves for better times ahead."

"Our winners also provide ample evidence that the window and door industry is ready to do its part in creating a greener, more sustainable world. We continue to see impressive strides in technologies that increase energy efficiency," adds Nicole Harris, publisher of *Window & Door*. "It's important to note that energy efficiency is not the sole priority in the market. Our judges also recognized many companies working to provide homeowners with more design options."

In addition to congratulating the winners, *Window & Door* would like to offer special thanks to General Glass International, Secaucus, N.J., for producing the 2010 Crystal Achievement Award plaques, and to C.R. Laurence Co., Los Angeles, for supplying the hardware.

Featured in the September 1 edition of *WDweekly*, the September issue of *Window & Door* and on WindowandDoor.com, the 2010 Crystal Achievement Award winners are:
