## Manufacturer's Certification Statement - Storm Windows

As it pertains to The American Recovery and Reinvestment Act of 2009

This Manufacturer's Certification Statement can be relied upon by you, the taxpayer, for verification that certain Harvey Building Products storm windows are eligible for the tax credits identified in The American Recovery and Reinvestment Act of 2009.

IRS Notice 2006-26, *Credit for Nonbusiness Energy Property*, identifies allowable credits in respect to Eligible Building Envelope Components to include "A storm window that, in combination with the exterior window over which it is installed, meets or exceeds the prescriptive criteria established by the IECC for the climate zone in which such storm window is installed".

Following these guidelines, Harvey Building Products has determined that the following Harvey Building Products storm windows are Eligible Building Envelope Components and qualify for the credit allowed under §25C.

### Prior to June 1, 2009

**What Qualifies:** Harvey Storm windows, including the Tru-Channel, with either Clear or Low-E glass that were applied over vinyl, wood, or wood clad windows with insulated glass qualify for the federal tax credits (Zones 4-8).

**What Does Not Qualify:** Storm windows, including the Tru-Channel, applied over vinyl, wood, or wood clad windows with single glass and aluminum prime windows do not qualify for the federal tax credit.

### After June 1, 2009

Storm windows, including the Tru-Channel, made after June 1, 2009 qualify for the federal tax credit if they are applied over Wood or Vinyl Windows that have Low-E or Low-E/Argon insulating glass and have a SHGC  $\leq 0.30$ .

**IMPORTANT:** The homeowner is responsible to provide their prime window performance capabilities in order to claim the federal tax credit.
