

Harvey Building Products Climate Defense System™

We are pleased to announce that we are expanding our brand into the Home envelope product segment. We are partnering with Typar and four other vendor-partners to offer a complete system of housewrap, flashings, construction tape, and companion products. This system is more than just printing our name on the product; we are offering an **industry exclusive 20 year product and labor warranty when properly installed with Harvey windows and patio doors**, 10 years for other manufacturers' products.

The Harvey Climate Defense System is a complete system – all accessory/optional products are compatible with the Typar Weather Protection System.

The Harvey Climate Defense System, when installed properly, will ensure the integrity of your building envelope for years to come.

All manufacturers' installation instructions must be followed to ensure coverage under warranty.

Typar HouseWrap

People want homes that are comfortable, cozy, energy-efficient and will stand the test of time. As part of the complete Typar Weather Protection System, Typar HouseWrap is a key building material to incorporate into your home plans to assure long-term homebuyer satisfaction.

Typar HouseWrap delivers four key advantages you won't find with other housewraps:

- **Superior water holdout** — blocks water from entering the wall cavity
- **Optimal moisture vapor transmission (MVT)** — it breathes so moisture can escape the wall cavity
- **Superior tear strength** — proven to withstand heavy winds and is almost five times stronger than the leading competitor's wrap
- **Exceptional surfactant resistance** — reduces the damaging effects that oils and tannins from OSB, soaps and powerwashing can have on the system's ability to block bulk moisture penetration

Typar Accessories

Before you install the windows or siding, assure a tight building envelope by sealing cracks and seams and installing flashing around rough openings. Typar offers all the accessories you need to do the job right as part of the complete Typar Weather Protection System.

- **Typar Flashing BA** — This modified bloc co-polymer flashing is based on Typar's proven weather resistant barrier and sealant technology, compatible with Typar HouseWrap and construction tape.
- **Typar Flashing Flex** — A conformable flexible, composite peel and stick flashing product, ideal to flash around arched windows. Use it on window flanges, sill plates, corners and joints to improve air and moisture holdout.
- **Typar Construction Tape** — A strong, coated polypropylene film that seals seams and edges to improve the integrity of the building envelope. Use it on window flanges, corners, joints and seams to improve the building envelope and air and moisture holdout.

CLIMATE DEFENSE SYSTEM™

Harvey Climate Defense System Companion Products

Harvey Building Products stocks a selection of products that are compatible with the Typar Weather Protection System.

All manufacturers' installation instructions must be followed to ensure coverage under warranty.

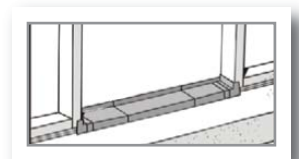

Stinger Cap Stapler & Plastic Cap Staples

- Must be used to meet the Harvey Climate Defense System warranty requirements
- The first airless cap system that delivers the holding power of a cap with the speed and ease of a hammer tacker
- "Best Practices" for sealing out moisture

Sill Pans

- Required for Majesty new construction windows and entry and patio door installations
- Available for 4-9/16" and 6-9/16" wall thicknesses for openings less than 40" or 120" in width

Optional Products Stocked by Harvey Building Products

GlazeLock Shims

- Save money on material and labor costs
- 3 sizes: 1/4", 1/8", 1/16" thickness
- Better than wood shims – won't rot, shrink, or swell
- Wood shims are also available

Geocel ProColor SWD Caulking

- Typar-approved sealant
- Easily applies wet or dry, in all temperatures
- If you are choosing another brand of caulking, please check the manufacturer's website to ensure compatibility with the Typar Weather Protection System.
- Bonds to all common building materials
- Permanently flexible

EZ FLO Spray Foam

- High volume/low expansion closed cell foam
- Stops air flow and keeps water out
- Ideal for use around windows and doors
